

BECOMING CLIMATE NEUTRAL BY 2030: ACTIVITIES BY HARRO HÖFLIGER

1

Existing buildings

Reduction of energy consumption:
Optimising the supply systems,
improving thermal isolation.

2

New buildings

Ecological planning and sustainable
construction.

3

Electric energy

Reduction of energy by using combined
heat and power systems and by optimising
heating and cooling systems.

4

Company cars

Increasing the proportion of vehicles
using climate-neutral forms of
energy (electricity, e fuels ...)

5

Business travel

Reduction of business trips by use of
digital communication methods and
mobile work principles.

6

Supply Chain Management

Sustainable procurement (ISO 20400),
involvement of suppliers.

7

Production

Reduce CO2 footprint of machinery
and equipment.

8

Waste management

Reduction of waste, further optimisation
of waste separation.
